DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 6/27/03 has been considered by the examiner.

Additional Prior Art Cited

Each of Ohno et al and Maruyama discloses an optical scanning device having substantial features recited in the claimed invention.

Claim Objections

Claims 3-4 are objected to because of the following informalities: "said convergent optical system" recited in claim 3 and 4, line 5, should be changed to --said third optical system--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 and 12-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohno et al.

Ohno et al discloses an optical system comprising: a light source (21); a front optical system including a first optical system having collimating lens (22), and a second optical system comprising a cylindrical lens (24); a deflector (26); and a rear optical system including a third optical system including cylindrical lens (27a) having negative power in a first direction and a cylindrical lens (27b) having positive power in the first direction, a separation optical system (28), and a fourth optical system including cylindrical mirrors (36-38) having refractive power in a second direction; wherein center light beams in the light path between the deflector and the rear optical system are parallel to one another in a plane including the second direction, and other light beams enter the rear optical system and progressively separate from one another in the plane. See Figs. 1-2 and the accompanying text.

In re claims 15-19 see paragraph 0028.

Allowable Subject Matter

Claims 7-11 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest an optical scanning system having "said other light beams intersect in said plane between said second optical system and said deflector" as recited in claim 7 in combination with the remaining features of the claim. Claims 8-11 and 20 are directly or indirectly dependent on claim 7 and thus are allowable at for the same reasons.
